# CONTENTS

FOREWORD ..... 8
1 Scope ..... 10
2 Normative references ..... 10
3 Terms, definitions and abbreviations ..... 11
3.1 Terms and definitions ..... 11
3.2 Abbreviated terms ..... 11
4 Description ..... 12
4.1 Types of AIS AtoN stations ..... 12
4.2 Type 1 AIS AtoN station ..... 15
4.2.1 Characteristics ..... 15
4.2.2 Capability ..... 17
4.2.3 Alternatives ..... 17
4.3 Type 2 AIS AtoN station ..... 18
4.3.1 Characteristics ..... 18
4.3.2 Capability ..... 18
4.3.3 Control receiver ..... 18
4.3.4 Alternatives ..... 18
4.4 Type 3 AIS AtoN Station ..... 19
4.4.1 Characteristics ..... 19
4.4.2 Capability ..... 19
4.4.3 AIS receiver (AIS Rx) ..... 19
4.4.4 Alternatives ..... 19
4.5 Optional direct configuration via VDL (types 2 and 3) ..... 20
4.6 Optional configuration via VDL using chaining (type 3) ..... 20
5 Requirements for AIS AtoN stations ..... 23
5.1 Physical layer ..... 23
5.1.1 Transmitter requirements ..... 23
5.1.2 Receiver requirements ..... 25
5.1.3 Power consumption ..... 26
5.1.4 Environmental requirements ..... 26
5.2 Link layer ..... 27
5.2.1 General ..... 27
5.2.2 AIS Messages ..... 27
5.2.3 Synchronisation ..... 27
5.2.4 VDL access schemes ..... 28
5.2.5 Autonomous mode ..... 30
5.2.6 Electronic position fix system ..... 31
5.2.7 Built-in integrity test ..... 32
5.3 Configuration method ..... 33
5.3.1 General ..... 33
5.3.2 Alternative for types 1, 2 and 3 ..... 33
5.3.3 Chaining of AIS AtoN stations ..... 36
5.4 Repeat broadcast of active AIS-SART message ..... 36
5.5 Other requirements ..... 36
5.5.1 Additional features ..... 36
5.5.2 Manufacturer’s information ..... 36

5.5.3 Marking and identification ..... 37
5.5.4 Additional connection points ..... 37
6 Tests of AIS AtoN stations ..... 37
6.1 General ..... 37
6.2 Test conditions ..... 37
6.2.1 Normal test conditions ..... 37
6.2.2 Extreme test conditions ..... 37
6.2.3 Standard test environment ..... 38
6.2.4 Test signals ..... 38
6.2.5 Arrangements for test signals applied to the receiver input ..... 39
6.2.6 Encoder for receiver measurements ..... 40
6.2.7 Waiver for receivers ..... 40
6.2.8 Impedance ..... 40
6.2.9 Artificial antenna (dummy load) ..... 40
6.2.10 Facilities for access ..... 40
6.2.11 Modes of operation of the transmitter ..... 40
6.2.12 Measurement uncertainties ..... 40
7 RF tests ..... 41
7.1 TDMA transmitter ..... 41
7.1.1 General ..... 41
7.1.2 Frequency error ..... 41
7.1.3 Carrier power ..... 42
7.1.4 Modulation spectrum slotted transmission ..... 42
7.1.5 Transmitter test sequence and modulation accuracy ..... 43
7.1.6 Transmitter output power versus time function (FATDMA and RATDMA) ..... 45
7.2 TDMA receivers (types 2 and 3) ..... 46
7.2.1 Sensitivity ..... 46
7.2.2 Error behaviour at high input levels ..... 47
7.2.3 Co-channel rejection ..... 47
7.2.4 Adjacent channel selectivity ..... 48
7.2.5 Spurious response rejection ..... 49
7.2.6 Inter-modulation response rejection ..... 52
7.2.7 Blocking or desensitization ..... 53
7.3 Conducted spurious emissions at the antenna ..... 54
7.3.1 Spurious emissions from the receiver ..... 54
7.3.2 Spurious emissions from the transmitter ..... 54
8 Functional tests ..... 55
8.1 Configuration method ..... 55
8.1.1 General ..... 55
8.1.2 Configuration for Message 21 ..... 55
8.1.3 Schedule mode A FATDMA Message 21 (single report, alternating channel operation) ..... 56
8.1.4 Schedule mode B FATDMA Message 21 (dual report, dual channel operation) ..... 57
8.1.5 Schedule mode C FATDMA Message 21 (single report, single channel operation) ..... 57
8.1.6 Schedule mode A RATDMA Message 21 (Type 3) (single report, alternating channel operation) ..... 58
8.1.7 Schedule mode B RATDMA Message 21 (Type 3) (dual report, dual channel operation) ..... 59

8.1.8 Schedule mode C RATDMA Message 21 (type 3) (single channel operation) ..... 59
8.1.9 Scheduled transmission of Message 6 ..... 60
8.1.10 Scheduled transmission of Message 8 ..... 61
8.1.11 Scheduled transmission of Message 12 ..... 61
8.1.12 Scheduled transmission of Message 14 ..... 61
8.1.13 Unscheduled transmission ..... 62
8.2 Synchronisation accuracy ..... 62
8.2.1 Implemented synchronisation modes and synchronisation error ..... 62
8.2.2 Synchronisation test without UTC (types 2 and 3) ..... 63
8.3 EPFS ..... 64
8.3.1 Position source ..... 64
8.3.2 Invalid position ..... 64
8.3.3 Off-position monitor ..... 64
8.4 Receive addressed message (types 2 and 3) ..... 65
8.4.1 Purpose ..... 65
8.4.2 Method of measurement ..... 65
8.4.3 Required results ..... 65
8.5 Interrogation response (Type 3) ..... 65
8.5.1 Purpose ..... 65
8.5.2 Method of measurement ..... 65
8.5.3 Required results ..... 66
8.6 Repeat AIS-SART messages ..... 66
8.6.1 Purpose ..... 66
8.6.2 Method of measurement ..... 66
8.6.3 Required results ..... 66
8.7 Additional functionality as implemented by the manufacturer ..... 66
8.7.1 Test for configuration of the receiver turn-on times (types 2 and 3) ..... 66
8.7.2 Test for configuration of payload transmission ..... 67
8.7.3 Test for forced broadcast ..... 68
8.7.4 Test for version information ..... 68
8.7.5 Test for DCR – AtoN function ID capability ..... 69
8.7.6 Test for assigning an encryption key for VDL configuration ..... 69
8.7.7 Test for VDL configuration using chaining (Type 3) ..... 70
8.8 BIIT ..... 75
8.8.1 Purpose ..... 75
8.8.2 Method of measurement ..... 75
8.8.3 Required results ..... 75
8.9 Transmitter shutdown procedure ..... 75
8.9.1 Purpose ..... 75
8.9.2 Method of measurement ..... 75
8.9.3 Required results ..... 75
8.10 Power supply ..... 75
8.10.1 Purpose ..... 75
8.10.2 Method of measurement ..... 76
8.10.3 Required results ..... 76
8.11 Environmental ..... 76
8.12 External removable media ..... 76
8.12.1 Purpose ..... 76

8.12.2 Method of measurement ..... 76
8.12.3 Required results ..... 76
8.13 Other tests ..... 76
8.13.1 Quality assurance ..... 76
8.13.2 Additional features ..... 76
8.13.3 Manual ..... 77
8.13.4 Marking and identification ..... 77
8.14 Optional TAG block encapsulation ..... 77
8.14.1 Application ..... 77
8.14.2 TAG block capabilities ..... 77
8.14.3 Activation of source-identification for output ..... 77
8.14.4 Activation of Destination-identification ..... 78
8.14.5 Activation of Source-identification for input ..... 79
8.14.6 Use of multiple source-identifications for input ..... 80
8.14.7 Test of grouping by TAG blocks for output ..... 81
8.14.8 Test of UNIX time output ..... 82
8.14.9 Test of line-count output ..... 82
Annex A (informative) AIS AtoN station configuration structures ..... 84
A.1 AIS AtoN station configuration structures ..... 84
A.2 MMSI Identification configuration command (AID) ..... 87
A.3 Extended/general AtoN station configuration command (ACF/ACG) ..... 89
A.4 Configure broadcast rates for AtoN Station message command (CBR) ..... 94
A.5 Configuration of encryption key (CEK) ..... 97
A.6 Configure the receiver turn-on times (ARW) ..... 98
A.7 Proprietary AtoN control command (MCR) ..... 99
A.8 Configuration of message payload for broadcast (MEB) ..... 101
A.9 Forced broadcast command (AFB) ..... 101
A.10 Version information (VER) ..... 102
A.11 AtoN function ID capability ..... 104
A.12 Query via the VDL for Message 21 content ..... 105
A.13 General query request ..... 106
A.14 Configuration of receiver operational times command (COP) ..... 107
A.15 Configuration of message payload for broadcast (MEB) ..... 108
A.16 Query response via the VDL for Message 21 configuration ..... 110
Annex B (normative) Message 21 – AtoN status bits ..... 113
Bibliography ..... 114

INTERNATIONAL ELECTROTECHNICAL COMMISSION

_____

# MARITIME NAVIGATION AND RADIOCOMMUNICATION EQUIPMENT AND SYSTEMS – AUTOMATIC IDENTIFICATION SYSTEM (AIS) –

## Part 2: AIS AtoN Stations – Operational and performance requirements, methods of testing and required test results

## FOREWORD

1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
6) All users should ensure that they have the latest edition of this publication.
7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 62320-2 has been prepared by IEC technical committee 80: Maritime navigation and radiocommunication equipment and systems.

This second edition cancels and replaces the first edition, published in 2008, and constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- additional cyber security measures;
- updated description of configuration via VDL;
- updated VDL access scheme requirements;
- new PI sentences and VDL message structures with added description for optional TAG blocks;

- added requirement for at least one standard method for configuration using Standard PI sentences;
- updated test methods and updated Annexes.

The text of this standard is based on the following documents:

| FDIS | Report on voting |
|---|---|
| 80/817/FDIS | 80/822/RVD |

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 62320 series, published under the general title *Maritime navigation and radiocommunication equipment and systems – Automatic identification system (AIS)*, can be found on the IEC website.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "http://webstore.iec.ch" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

**IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**

# MARITIME NAVIGATION AND RADIOCOMMUNICATION EQUIPMENT AND SYSTEMS – AUTOMATIC IDENTIFICATION SYSTEM (AIS) –

# Part 2: AIS AtoN Stations – Operational and performance requirements, methods of testing and required test results

## 1 Scope

This part of IEC 62320 specifies the operational and performance requirements, methods of testing and required test results for AIS AtoN Stations compatible with the performance standards adopted by IMO Resolution MSC.74(69), Annex 3, Universal AIS. It incorporates the technical characteristics of non-shipborne AIS AtoN equipment, included in Recommendation ITU-R M.1371 and IALA Recommendation A-126. Where applicable, it also takes into account the ITU Radio Regulations. This standard takes into account other associated IEC International Standards and existing national standards, as applicable.

This document is applicable for automatic identification system (AIS) installations on aids to navigation (AtoN).

## 2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60945, *Maritime navigation and radiocommunication equipment and systems – General requirements – Methods of testing and required test results*

IEC 61108 (all parts), *Maritime navigation and radiocommunication equipment and systems – Global navigation satellite systems (GNSS)*
