CONTENTS

FOREWORD.....	4
1 Scope.....	6
2 Normative references	6
3 Terms, definitions, abbreviated terms and letter symbols.....	6
3.1 Terms and definitions.....	6
3.2 Abbreviated terms.....	8
3.3 Letter symbols (quantity symbols / unit symbols).....	9
4 Measuring devices.....	10
4.1 General.....	10
4.2 Light measuring device (LMD).....	10
4.2.1 Luminance meter.....	10
4.2.2 Spectroradiometer (spectral radiance-meter).....	10
4.2.3 Conoscopic system.....	10
4.2.4 Image sensor.....	10
4.3 Other devices	10
4.3.1 Sample stage	10
4.3.2 Light absorber	11
5 General measuring conditions	11
5.1 Standard conditions	11
5.2 Measurement setup	11
5.3 Warm-up time	12
6 Electrical measurement methods	12
6.1 Conditions	12
6.2 Current	12
6.3 Voltage	12
6.4 Power consumption.....	12
7 Optical measurement methods	13
7.1 General.....	13
7.2 Dark room conditions	13
7.2.1 General	13
7.2.2 Measurement items under the external lighting condition.....	13
7.2.3 Measurement items under the internal lighting condition.....	13
7.3 Conditions	13
7.4 Luminance	14
7.4.1 General	14
7.4.2 Procedures	14
7.5 Angular luminance distribution (ALD).....	15
7.6 Luminance uniformity or non-uniformity.....	15
7.7 Spectral power distribution.....	16
7.8 Chromaticity.....	16
7.9 Colour uniformity	16
7.10 Angular luminance uniformity.....	16
7.11 Angular colour uniformity	16
7.12 FLU polarization characteristic measurement.....	16
7.13 Normal- or inverted-state FLU characteristics	17
7.14 Optical noise measuring.....	17

7.15	Cosmetic quality or perceptual visual quality.....	17
Annex A (informative)	Optical structure of an FLU.....	19
Annex B (informative)	Normal-state FLU and inverted-state FLU	20
Annex C (informative)	Angular measurement system	21
Annex D (informative)	Measurement parameters for BRDF and BTDF.....	22
D.1	BRDF.....	22
D.2	BTDF	22
Annex E (informative)	Determining the polarization state of reflected light on the front surface of an FLU or transmitted light through the FLU	24
Annex F (informative)	Optical transfer function (OTF) of an FLU	25
F.1	Optical transfer function evaluation chart	25
F.2	Example of optical transfer function	25
Annex G (informative)	Sources of optical noise in a normal-state FLU with a reflective display.....	27
Annex H (informative)	Formulation of contrast ratio for a reflective display with an integrated FLU.....	28
H.1	Contrast ratio for a reflective display without FLU integration.....	28
H.2	Contrast ratio for a reflective display with FLU integration.....	28
Annex I (informative)	Example of optical noise of an FLU	29
	Bibliography.....	30
Figure 1	– Example of light absorber (optical trap).....	11
Figure 2	– Example of measurement setup for a LED FLU	12
Figure 3	– Illustration of zenith angle θ and azimuth angle ϕ (normal-state FLU).....	14
Figure 4	– Polar coordinate system for frontlight unit measurement	15
Figure 5	– Example of light polarizing characteristics of an FLU in inverted state.....	17
Figure A.1	– Direct edge-lit FLU and indirect edge-lit FLU.....	19
Figure B.1	– Normal-state FLU	20
Figure B.2	– Inverted-state FLU	20

INTERNATIONAL ELECTROTECHNICAL COMMISSION

DISPLAY LIGHTING UNIT –

Part 2-3: Electro-optical measuring methods for LED frontlight unit

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 62595-2-3 has been prepared by IEC technical committee TC 110: Electronic display devices.

The text of this International Standard is based on the following documents:

CDV	Report on voting
110/891/CDV	110/933A/RVC

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 62595 series, published under the general title *Display lighting unit*, can be found on the IEC website.

Future standards in this series will carry the new general title as cited above. Titles of existing standards in this series will be updated at the time of the next edition.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

DISPLAY LIGHTING UNIT –

Part 2-3: Electro-optical measuring methods for LED frontlight unit

1 Scope

This part of IEC 62595 specifies the standard measurement conditions and measuring methods for determining electrical, optical, and electro-optical properties of LED frontlight units (FLUs) for reflective displays.

NOTE: See 3.1.1 for a definition of reflective display.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 61747-6-2, *Liquid crystal display devices – Part 6-2: Measuring methods for liquid crystal display modules – Reflective type*

IEC 62595-1-2, *Display lighting unit – Part 1-2: Terminology and letter symbols*

IEC 62595-2-1, *Display lighting unit – Part 2-1: Electro-optical measuring methods of LED backlight unit*

IEC 62679-3-3, *Electronic paper displays – Part 3-3: Optical measuring methods for displays with integrated lighting units*
