## CONTENTS

FOREWORD .....	6
1 Scope .....	8
2 Normative references .....	8
3 Abbreviations .....	9
4 Terminal categories .....	11
5 Definition of receiving conditions .....	12
5.1 Portable reception .....	12
5.2 Mobile reception .....	12
6 Frequencies and channel bandwidths .....	13
6.1 Channel frequencies .....	13
6.2 Supported frequency ranges .....	13
6.3 Supported bandwidths .....	14
7 DVB-T/H modes .....	14
7.1 Supported DVB-T/H modes .....	14
7.2 Change of modulation parameters .....	14
7.3 Tuning procedure .....	14
8 Transmitter performance .....	15
8.1 Transmitter noise-like impairments .....	15
8.1.1 Noise-like processes .....	15
8.2 Further transmitter impairments .....	16
8.2.1 Group delay errors .....	16
8.2.2 Phase noise in OFDM systems .....	17
8.2.3 OFDM clock frequency .....	17
8.3 Spectrum masks .....	17
8.3.1 DVB-T signals (general) .....	17
8.3.2 DVB-T signals (critical cases) .....	18
8.3.3 DVB-T signals (DVB-T in adjacent channel) .....	18
9 Receiver antenna characteristics .....	18
9.1 Antennas for terminal category a .....	18
9.2 Antennas for terminal category b1 .....	18
9.3 Antennas for terminal category b2 and c .....	19
9.4 External antennas .....	20
9.4.1 General .....	20
9.4.2 External antennas for terminal category b2 and c .....	20
9.4.3 External antenna connector .....	20
10 Receiver performance .....	21
10.1 Reference model .....	21
10.2 Noise model .....	22
10.3 Degradation criteria .....	24
10.4 Diversity receivers .....	25
10.5 DVB-H receivers .....	26
10.6 Channel models .....	27
10.6.1 DVB-T Rayleigh channel ( $P_1$ ) .....	27
10.6.2 Portable indoor (PI) and outdoor (PO) channels .....	27
10.6.3 Mobile reception .....	29

10.7	<i>C/N</i> performance .....	34
10.7.1	<i>C/N</i> performance in Gaussian channel .....	34
10.7.2	<i>C/N</i> performance in DVB-T Rayleigh channel ( $P_1$ ) .....	34
10.7.3	<i>C/N</i> Performance in portable indoor (PI) and portable outdoor (PO) channels .....	35
10.7.4	DVB-T <i>C/N</i> performance in mobile channels for terminal class a .....	36
10.7.5	DVB-H <i>C/N</i> performance in mobile channels .....	37
10.8	Receiver minimum and maximum signal input levels .....	38
10.8.1	Noise floor .....	38
10.8.2	Minimum input levels (sensitivity) .....	39
10.8.3	Total maximum power for wanted and unwanted signals .....	39
10.8.4	Maximum input levels for wanted and unwanted signals .....	39
10.9	Immunity to analogue and/or digital signals in other channels .....	40
10.9.1	General .....	40
10.9.2	Interfering signal definitions .....	41
10.9.3	Selectivity patterns .....	42
10.9.4	Linearity patterns .....	42
10.9.5	Immunity to pattern S1 .....	43
10.9.6	Immunity to pattern S2 .....	44
10.9.7	Immunity to pattern L1 .....	45
10.9.8	Immunity to pattern L2 .....	46
10.9.9	Immunity to pattern L3 .....	47
10.9.10	Immunity to pattern L4 .....	48
10.10	Immunity to co-channel interference from analogue TV signals .....	49
10.11	Guard interval utilization .....	49
10.11.1	Performance with echo within guard interval .....	49
10.11.2	Performance with echo outside guard interval .....	50
10.12	Tolerance to impulse interference .....	52
10.12.1	General .....	52
10.12.2	Test patterns .....	52
10.13	EMC characteristics .....	54
10.13.1	Terminal category c .....	54
10.13.2	Terminal category a and b .....	54
11	Interoperability with other radio systems .....	54
11.1	Cellular radios .....	54
11.1.1	General .....	54
11.1.2	Cellular radio uplink wanted signal interference to DVB-T/H receiver .....	56
11.1.3	Cellular radio uplink unwanted signal interference to DVB-T/H receiver .....	57
11.2	DVB-RCT .....	58
Annex A (informative)	Active external antennas and system noise floor .....	59

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

## MOBILE AND PORTABLE DVB-T/H RADIO ACCESS –

## Part 1: Interface specification

## FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with an IEC Publication.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 62002-1 has been prepared by technical area 1: Terminals for audio, video and data services and content, of IEC technical committee 100: Audio, video and multimedia systems and equipment.

This second edition cancels and replaces the first edition, published in 2005 and constitutes a technical revision.

The main changes with respect to the previous edition are listed below.

- DVB-H has been included as a part of the main specification.
- All the performance figures have been revised as new simulation results have been made available as well as new reference receivers for DVB-H have been developed.
- DVB-H now includes all the different MPE-FEC code rates.
- New portable indoor and portable outdoor channel models have been included as well as performance figures for those.
- A new 2x TU-6 mobile SFN test channel has been included.

- A new L4 linearity pattern has been added.
- Dedicated performance figures for DVB-H for S1, S2, L1 to L4 interference patterns have been included.
- A new GSM-interference measurement method has been added.

The text of this standard is based on the following documents:

CDV	Report on voting
100/1289/CDV	100/1381/RVC

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts of the IEC 62002 series, under the general title *Mobile and portable DVB-T/H radio access*, can be found on the IEC website.

The committee has decided that the contents of this publication will remain unchanged until the maintenance result date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed;
- withdrawn;
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

The content of the corrigendum 1 (2008-07) has been included in this copy.

## MOBILE AND PORTABLE DVB-T/H RADIO ACCESS –

### Part 1: Interface specification –

#### 1 Scope

This part of IEC 62002 is a radio access specification for mobile, portable and hand-held portable devices capable of receiving DVB-T/H services. It includes informative system aspects as well as specifications for minimum RF-performance. It covers terminals in three main classes, namely integrated car terminals, portable digital TV sets and hand-held portable convergence terminals. Interoperability with integrated cellular radios is also considered. The specification covers the following areas.

- Frequency ranges
- Supported modes
- Definition of receiving conditions
- Definition of the receiver RF-reference model
- Definition of degradation criteria
- Antenna characteristics
- Channel models
- $C/N$ -performance with different channels
- Minimum and maximum input levels
- Immunity to interfering signals
- Definition of an ensemble of interference patterns
- Tolerance to impulse interference
- SFN-performance
- Transmitter minimum performance
- Interoperability of cellular radios
- EMC aspects
