## CONTENTS

FOREWORD .....	4
ORIGINAL UPNP DOCUMENTS (informative) .....	6
<b>1. Overview and Scope .....</b>	<b>8</b>
1.1. External dependencies .....	8
<b>2. Service Modeling Definitions .....</b>	<b>9</b>
2.1. ServiceType .....	9
2.2. State Variables .....	9
2.2.1. SourceProtocolInfo .....	9
2.2.2. SinkProtocolInfo .....	9
2.2.3. CurrentConnectionIDs .....	10
2.2.4. A_ARG_TYPE_ConnectionStatus .....	10
2.2.5. A_ARG_TYPE_ConnectionManager .....	10
2.2.6. A_ARG_TYPE_Direction .....	10
2.2.7. A_ARG_TYPE_ProtocolInfo .....	10
2.2.8. A_ARG_TYPE_ConnectionID .....	10
2.2.9. A_ARG_TYPE_AVTransportID .....	10
2.2.10. A_ARG_TYPE_RcsID .....	10
2.3. Eventing and Moderation .....	11
2.4. Actions .....	11
2.4.1. GetProtocolInfo .....	11
2.4.2. PrepareForConnection .....	12
2.4.3. ConnectionComplete .....	13
2.4.4. GetCurrentConnectionIDs .....	14
2.4.5. GetCurrentConnectionInfo .....	14
2.4.6. Common Error Codes .....	16
2.5. Theory of Operation .....	17
2.5.1. Purpose .....	17
2.5.2. ProtocolInfo Concept .....	17
2.5.3. Typical Control Point Operations .....	18
2.5.4. Relation to Devices without ConnectionManagers .....	19
<b>3. XML Service Description .....</b>	<b>20</b>
<b>4. Test .....</b>	<b>23</b>
<b>Annex A (normative) Protocol Specifics .....</b>	<b>24</b>
A.1 Application to 'HTTP GET' - streaming .....	24
A.1.1 ProtocolInfo definition .....	24
A.1.2 Implementation of ConnectionManager::PrepareForConnection .....	24
A.1.3 Implementation of ConnectionManager::ConnectionComplete .....	24
A.1.4 Automatic Connection Cleanup .....	24
A.2 Application to RTSP/RTP/UDP streaming .....	24
A.2.1 ProtocolInfo definition .....	24
A.2.2 Implementation of ConnectionManager::PrepareForConnection .....	25
A.2.3 Implementation of ConnectionManager::ConnectionComplete .....	25
A.2.4 Automatic Connection Cleanup .....	25
A.3 Application to device-internal streaming .....	25
A.4 Application to IEC61883 streaming .....	25
A.4.1 ProtocolInfo Definition .....	25
A.4.2 Implementation of ConnectionManager::PrepareForConnection .....	26
A.4.3 Implementation of ConnectionManager::ConnectionComplete .....	27
A.4.4 Automatic Connection Cleanup .....	27
A.5 Application to vendor-specific streaming .....	27

## LIST OF TABLES

Table 1: State Variables .....	9
Table 2: Event Moderation.....	11
Table 3: Actions .....	11
Table 4: Arguments for GetProtocolInfo .....	11
Table 5: Arguments for PrepareForConnection.....	12
Table 6: Arguments for ConnectionComplete .....	13
Table 7: Arguments for GetCurrentConnectionIDs .....	14
Table 8: Arguments for GetCurrentConnectionInfo .....	15
Table 9: Common Error Codes.....	16
Table 10: Defined Protocol Info for ConnectionManager:1 .....	18

## **INFORMATION TECHNOLOGY – UPNP DEVICE ARCHITECTURE –**

### **Part 3-11: Audio Video Device Control Protocol – Connection Manager Service**

#### **FOREWORD**

- 1) ISO (International Organization for Standardization) and IEC (International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards. Their preparation is entrusted to technical committees; any ISO and IEC member body interested in the subject dealt with may participate in this preparatory work. International governmental and non-governmental organizations liaising with ISO and IEC also participate in this preparation.
- 2) In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.
- 3) The formal decisions or agreements of IEC and ISO on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC and ISO member bodies.
- 4) IEC, ISO and ISO/IEC publications have the form of recommendations for international use and are accepted by IEC and ISO member bodies in that sense. While all reasonable efforts are made to ensure that the technical content of IEC, ISO and ISO/IEC publications is accurate, IEC or ISO cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 5) In order to promote international uniformity, IEC and ISO member bodies undertake to apply IEC, ISO and ISO/IEC publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any ISO/IEC publication and the corresponding national or regional publication should be clearly indicated in the latter.
- 6) ISO and IEC provide no marking procedure to indicate their approval and cannot be rendered responsible for any equipment declared to be in conformity with an ISO/IEC publication.
- 7) All users should ensure that they have the latest edition of this publication.
- 8) No liability shall attach to IEC or ISO or its directors, employees, servants or agents including individual experts and members of their technical committees and IEC or ISO member bodies for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication of, use of, or reliance upon, this ISO/IEC publication or any other IEC, ISO or ISO/IEC publications.
- 9) Attention is drawn to the normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.

IEC and ISO draw attention to the fact that it is claimed that compliance with this document may involve the use of patents as indicated below.

ISO and IEC take no position concerning the evidence, validity and scope of the putative patent rights. The holders of the putative patent rights have assured IEC and ISO that they are willing to negotiate free licences or licences under reasonable and non-discriminatory terms and conditions with applicants throughout the world. In this respect, the statements of the holders of the putative patent rights are registered with IEC and ISO.

Intel Corporation has informed IEC and ISO that it has patent applications or granted patents.

Information may be obtained from:

Intel Corporation  
Standards Licensing Department  
5200 NE Elam Young Parkway  
MS: JFS-98  
USA – Hillsboro, Oregon 97124

Microsoft Corporation IEC and ISO that it has patent applications or granted patents as listed below:

6101499 / US; 6687755 / US; 6910068 / US; 7130895 / US; 6725281 / US; 7089307 / US; 7069312 / US;  
10/783 524 / US

Information may be obtained from:

Microsoft Corporation  
One Microsoft Way  
USA – Redmond WA 98052

Philips International B.V. has informed IEC and ISO that it has patent applications or granted patents.

Information may be obtained from:

Philips International B.V has informed. – IP&S  
High Tech campus, building 44 3A21  
NL – 5656 Eindhoven

NXP B.V. (NL) has informed IEC and ISO that it has patent applications or granted patents.

Information may be obtained from:

NXP B.V. (NL)  
High Tech campus 60  
NL – 5656 AG Eindhoven

Matsushita Electric Industrial Co. Ltd. has informed IEC and ISO that it has patent applications or granted patents.

Information may be obtained from:

Matsushita Electric Industrial Co. Ltd.  
1-3-7 Shiromi, Chuoh-ku  
JP – Osaka 540-6139

Hewlett Packard Company has informed IEC and ISO that it has patent applications or granted patents as listed below:

5 956 487 / US; 6 170 007 / US; 6 139 177 / US; 6 529 936 / US; 6 470 339 / US; 6 571 388 / US; 6 205 466 / US

Information may be obtained from:

Hewlett Packard Company  
1501 Page Mill Road  
USA – Palo Alto, CA 94304

Samsung Electronics Co. Ltd. has informed IEC and ISO that it has patent applications or granted patents.

Information may be obtained from:

Digital Media Business, Samsung Electronics Co. Ltd.  
416 Maetan-3 Dong, Yeongtang-Gu,  
KR – Suwon City 443-742

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights other than those identified above. IEC and ISO shall not be held responsible for identifying any or all such patent rights.

ISO/IEC 29341-3-11 was prepared by UPnP Implementers Corporation and adopted, under the PAS procedure, by joint technical committee ISO/IEC JTC 1, *Information technology*, in parallel with its approval by national bodies of ISO and IEC.

The list of all currently available parts of the ISO/IEC 29341 series, under the general title *Universal plug and play (UPnP) architecture*, can be found on the IEC web site.

This International Standard has been approved by vote of the member bodies, and the voting results may be obtained from the address given on the second title page.

## ORIGINAL UPNP DOCUMENTS (informative)

Reference may be made in this document to original UPnP documents. These references are retained in order to maintain consistency between the specifications as published by ISO/IEC and by UPnP Implementers Corporation. The following table indicates the original UPnP document titles and the corresponding part of ISO/IEC 29341:

UPnP Document Title	ISO/IEC 29341 Part
UPnP Device Architecture 1.0	ISO/IEC 29341-1
UPnP Basic:1 Device	ISO/IEC 29341-2
UPnP AV Architecture:1	ISO/IEC 29341-3-1
UPnP MediaRenderer:1 Device	ISO/IEC 29341-3-2
UPnP MediaServer:1 Device	ISO/IEC 29341-3-3

UPnP SecurityConsole:1 Service	ISO/IEC 29341-13-11

## 1. Overview and Scope

This service definition is compliant with the UPnP Device Architecture version 1.0.

This service-type enables modeling of streaming capabilities of A/V devices, and binding of those capabilities between devices. Each device that is able to send or receive a stream according to the UPnP AV device model [ref to dev model] will have 1 instance of the ConnectionManager service. This service provides a mechanism for control points to:

1. Perform capability matching between source/server devices and sink/renderer devices,
2. Find information about currently ongoing transfers in the network,
3. Setup and teardown connections between devices (when required by the streaming protocol).

The ConnectionManager service is generic enough to properly abstract different kinds of streaming mechanisms, such as HTTP-based streaming, RTSP/RTP-based and 1394-based streaming.

The ConnectionManager enables control points to abstract from physical media interconnect technology when making connections. The term ‘stream’ used in this service template refers to both analog and digital data transfer.
